

HOLTOP

Comfort Fresh Air

Ceiling Mounted Energy Recovery Ventilator

Just be smarter

New structure and intelligent control

-  Low-temperature operation
-  Pressure balancing
-  Advanced sleep function
-  Intelligent airflow compensation

Comfort fresh air

Ceiling mounted ERV, makes good indoor air quality.

Health

- * Reducing the risk of COVID-19 and other respiratory infections that spread through the air.
- * Enhancing productivity, comfort and cognitive performance by alleviating stress and sick building syndrome.
- * Avoiding premature mortality and chronic diseases caused by air pollution, such as cardiovascular and respiratory diseases and lung cancer.

Comfort

- * Reducing humidity, pollutants and stale air that can cause health and comfort problems.
- * Keeping a comfortable indoor relative humidity level regardless of the outdoor conditions.

Save Energy Costs And Long-Term Payback

- * Reducing energy consumption and HVAC equipment capacity by transferring heat and moisture between the outgoing and incoming air streams.
- * It meets the ventilation and energy standards for airtight buildings that cannot rely on natural ventilation alone.
- * Increasing tenant satisfaction and retention in commercial buildings that provide healthy indoor air. Prolonging the life period of the HVAC system.

Easy Maintenance And Upkeep

- * The heat exchangers and filters are removable for maintenance, the filters are washable.

Better indoor air quality & less energy consumption

Holtop Ceiling Mounted Energy Recovery Ventilator introduces clean and fresh air to indoor and exhausts the polluted air outdoors.

When the outdoor air is comfortable, it works in bypass mode, the fresh air can be directly supplied to the room without heat exchange, and the exhaust air in the room can be discharged at the same time, to improve the indoor air quality. In winter or summer time, to provide comfortable indoor atmosphere and reduce the energy consumption, it works in energy recovery mode. This product is built with high efficient **5th Generation Heat Exchanger** that integrates compact and delicate filter slider.

It uses less energy while providing greater benefits, such as keeping your home healthier, replacing stale air with fresh air, and removing various contaminants.

Comfort Fresh Air

Ceiling Mounted Energy Recovery Ventilator

CFA150C-1000C

CFA1500C-2000C

FEATURES

- Wide airflow range among 150-2000 m³/h.
- Plastic encapsulated DC motor, 10 speeds.
- Supply air purification with primary filter (G3) and medium filter (F7) optional.
- Occlusal edge sealing technology.
- High efficiency 5th generation total heat exchanger.
- Reserved side ports for OA and EA, flexible installation.
- Auto bypass.
- Two types of installation to suitable room.
- A smarter control system Android/ IOS.
- Energy efficiency class of A+ or A according to EU NO. 1253/2014.

DESIGN

■ CASING

- Easy installation with integrated EPS casing.
- Better insulation, air tightness, and noise reduction.
- Mid-mounted fans, with stable air flow to have better heat exchange efficiency and stable operation.

■ FLEXIBLE INSTALLATION

- Parallel airflow.
- Available with inverted installation.
- Reserved side ports for OA and EA.

■ OCCLUSAL EDGE SEALING TECHNOLOGY

- Triple folded edge thickness improving casing strength.
- Higher production efficiency.
- Good appearance and air tightness.

■ NEW DC FANS

Comparing with the old AC motor with metal casing, the new motor operate more stable, silent and energy-efficient, saving up to 40%.

■ 5TH GENERATION TOTAL HEAT EXCHANGER

- New ER paper with higher heat exchanger efficiency.
- The heat exchange materials are mildew resistant and fire retardant.
- Integrated structure, better air tightness and appearance.

Mildew-proof and fire-protection rating testing certification

■ INTEGRATED FILTER GRID

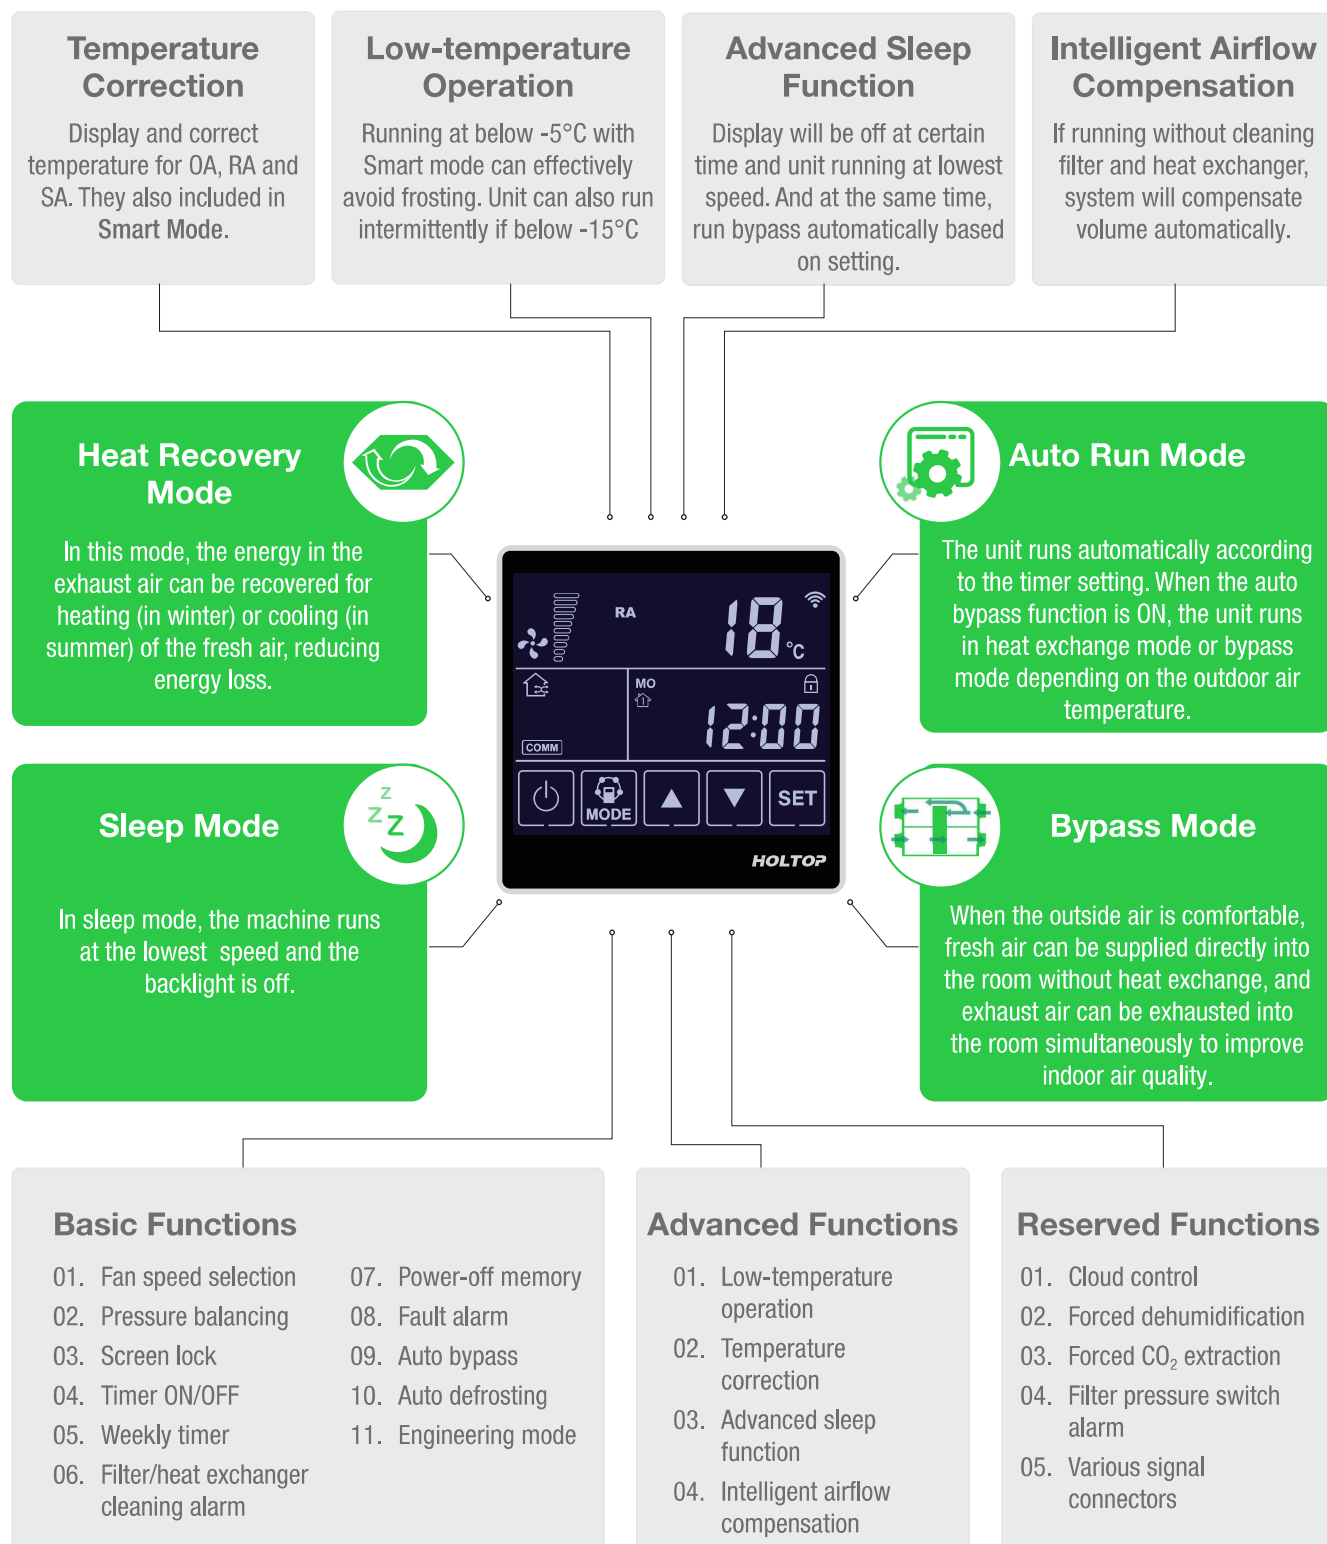

Reserved track integrated with primary filter, medium F7 filter is optional.

Advanced LCD Remote Control Panel

Intelligent Control

Your home
indoor climate
in your hand with
SMART LIFE
app

WIFI FUNCTION

Wifi function is available to control and monitor the ventilation system from anywhere in the world with a smart phone. For healthy living, users can monitor indoor air quality at their fingertips.

■ MONITORING INDOOR AIR QUALITY

Monitor local weather, temperature, humidity, CO₂ concentration at your hand for healthy living.

■ VARIABLE SETTING

Speed settings, timely switch, bypass, filter alarm.

■ GROUP CONTROL

Smart control according to local weather. One APP can control multiple units. Linkage control with other appliances with Tuya IoT.

SMART LIFE app is available at Google Play market and App Store.

TECHNICAL PARAMETERS

Model	Rated Airflow (m³/h)	External Pressure (Pa)	Enthalpy Efficiency (%)		Temperature Efficiency (%)	Noise dB(A)	Voltage (V)	Input Power (W)	N.W. (kg)

INSTALLATION DIAGRAM

APPLICATIONS

■ PROVIDES COMFORTABLE BREATHING ENVIRONMENT IN VARIOUS PREMISES

With a full range of components designed to work together, Holtop Comfort Fresh Air ERV can be integrated into a home simply and effectively to provide fresh air and comfort.

■ HOW TO SELECT THE RIGHT MODEL FOR YOUR HOUSE?

1. Calculation of airflow according to air exchange rate.

$$L = V_{\text{prem.}} * Ach \text{ [m}^3/\text{h]},$$

where $V_{\text{prem.}}$ – premise volume [m^3],

Ach – minimum air exchange per hour, refer air exchange table.

	Premise	Air exchange rate
Domestic premises	Living room of apartments or hostel residential premises	3 m ³ /h for 1 m ² in residential premises
	Kitchen in flat or hostel	6-8
	Bathroom	7-9
	Shower cabin	7-9
	WC	8-10
	Home laundry room	7
	Cloakroom	1.5
	Storeroom	1
	Garage	4-8
Industrial premises and large premises	Cellar	4-6
	Theatre, cinema, conference hall	20-40 m ³ per each visitor
	Office	5-7
	Restaurant	8-10
	Bar, café, pub, billiard room	9-11
	Professional kitchen	10-15
	Supermarket	1.5-3
	Smoking rooms	10
	Swimming pool	10-20
	Industrial painting shop	25-40
	School classroom	3-8
	Server rooms	5-10

2. Calculation of airflow according to number of inhabitants.

$$L = L_1 * N_L \text{ [m}^3/\text{hour]},$$

where L_1 – rated value for air volume per one person, m³/h*person,
 N_L – number of inhabitants in the premises

20-25 m ³ /h per one person at low physical activity
45 m ³ /h per one person at light physical activity
60 m ³ /h per one person at heavy physical activity

3. Choose the bigger result as the required airflow. Then choose the model with the required airflow accordingly.

GROUP CONTROL

The ventilator can create group control at the APP, the quantity is not limited. User can control all the ventilators in the group easily.

SCENE CONTROL

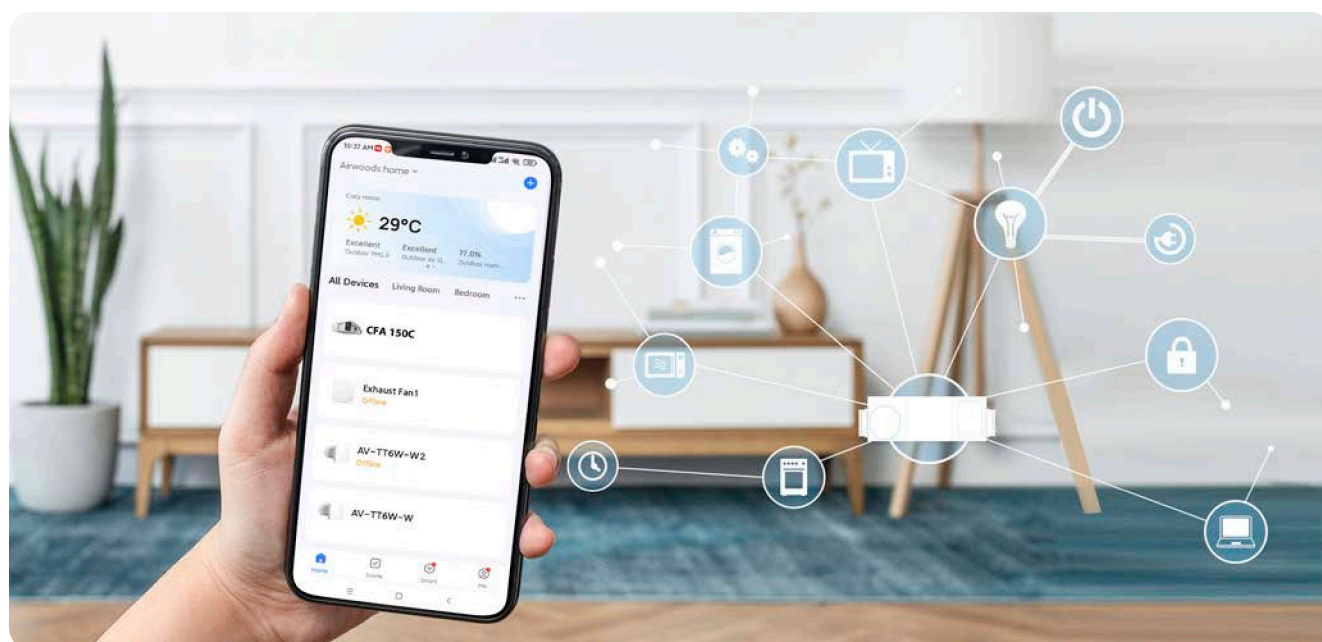

User can create the scene according to the weather changes, schedule or the device status changes.

For example, when the weather shows the outdoor relative humidity is higher than 85%, user can set the ventilator to stop running, to prevent the outdoor humidity coming inside. The unit will run according to the setting automatically.

LINKAGE CONTROL

Users can add the devices with Tuya APP to their home screen. For example, they can add all the single room ventilators, exhaust fans or light switches in the APP and control them at their will.
